

## **WEC Climate Change Statement**

*The WEC Board of Directors acknowledges that rapid global warming and associated climate instability are real, and are significantly attributable to human activities. We are concerned that global warming presents great risk of serious and negative economic, environmental and health ramifications to humans, along with challenges to the continued existence of numerous other forms of life on this planet.*

*WEC urges NRECA and NEAEC to support meaningful efforts on the part of the electricity sector to address global warming, including legislation at the federal, state, and local levels to mitigate the harmful effects of climate change. An effective response must also address financial impacts incurred by cooperatives burdened with legacy power supply commitments.*

*An energy provider owned by its members since 1939.  
Washington Electric Cooperative is an equal opportunity provider and employer.*
